LED Spotlight Attachment by iFootage

10 Times Brightening

Introducing 6FPL, equipped with professional optical lenses, not only providing you with a more refined spotlight effect but also unleashing higher illuminance from the lamp. Paired with SL1 220DN/320DN, it achieves an impressive 10x illuminance enhancement.

Precise Zooming

Switch Between focused and Wide-Angle Lighting

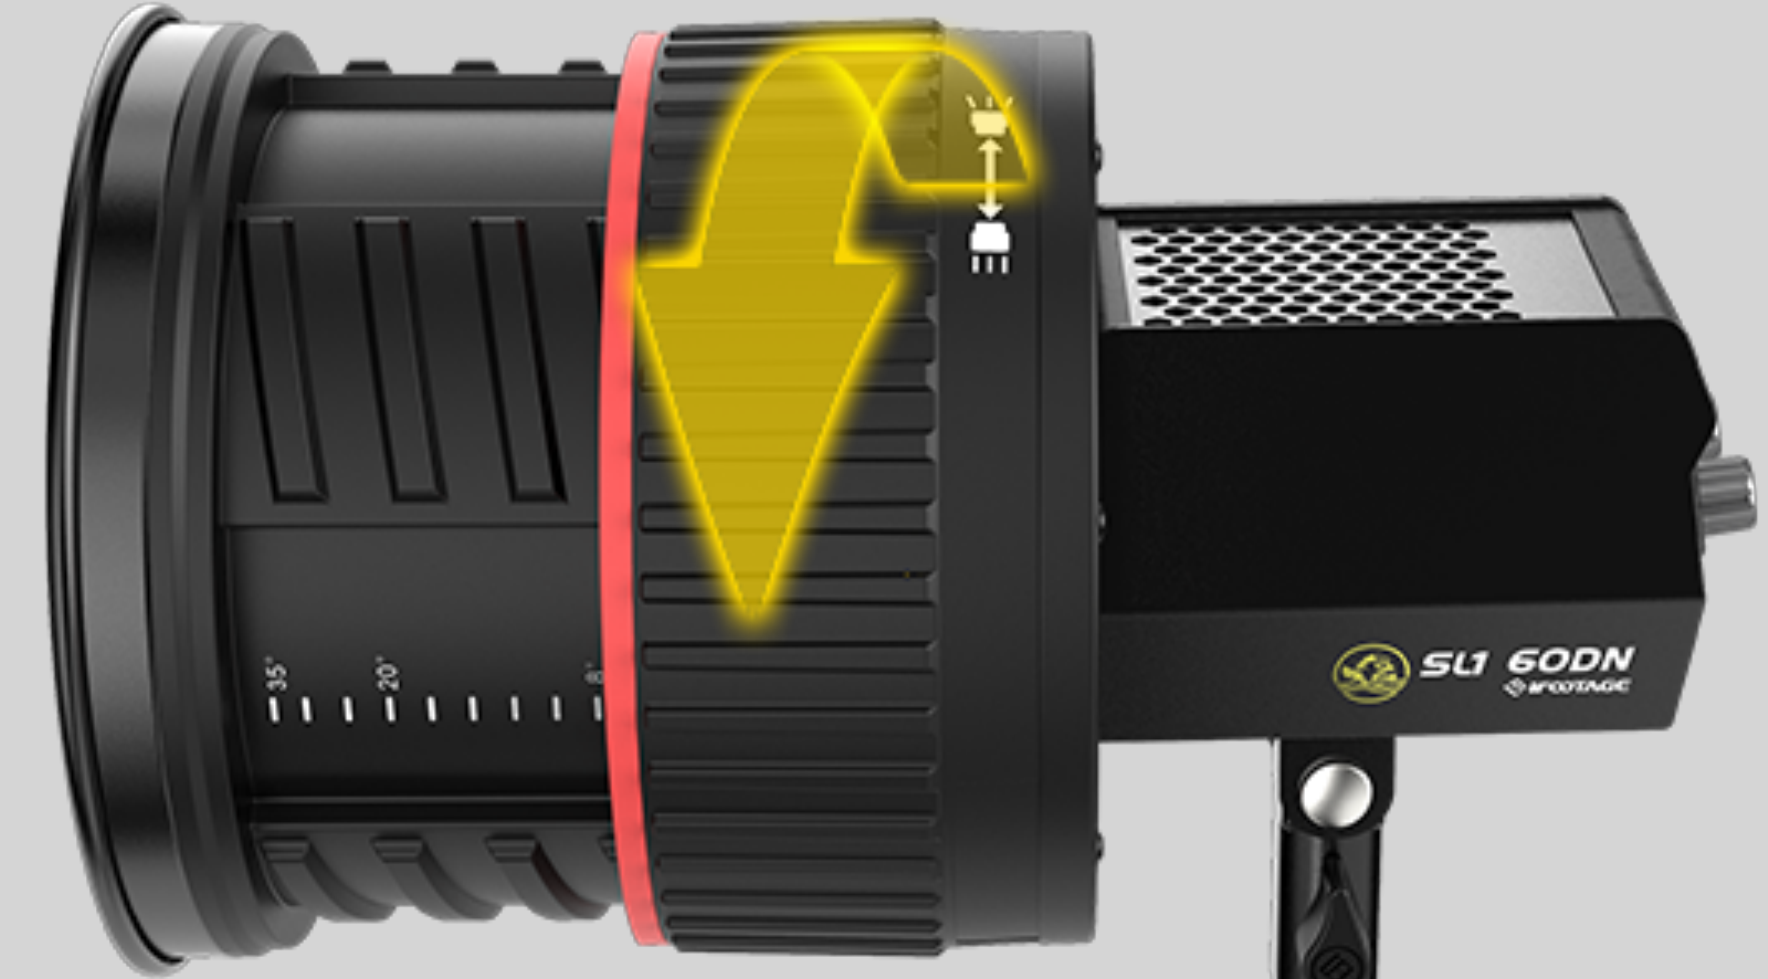

Our threaded rotating and telescoping design allows for easy 12°-40°(6FPL)/8°-35°(6FPM) angle adjustment with a simple turn of the zoom ring. This precise control not only focuses the angle of light, but also produces parallel beams. With smooth adjustments and easy, one-handed operation, our lighting system puts you in complete control.

Sharpe & Clear Spotighting

Experience clear, realistic lighting with no overlapping shadows. Our Fresnel lens produces sharper, more precise shadows than a reflector.

Take Control of Your Lighting

At the front end, a 180mm circular interface with the same diameter as the reflector cup can be used with the same four-leaf barndoors to achieve precise light control
