

FLUID HEADS 150 MM

MASTER 25

DESCRIPTION

The new MASTER 25 presented in its classy Black & Gold design, as a tribute to the famed CARTONI Fluid Heads of yesteryear, is a robust, yet lightweight Fluid Head. Designed to support the latest cameras complete with long lens, viewfinders, prompts and pan bar controls for new studio production as well as OB/ENG/EFP applications, with a payload capacity of up to 30 kg (66 lbs). The Master 25 is also available with grey anodized aluminum.

The lightweight 5 kg (11 lbs) Master 25 features a tilt range of +/-90° and easy to use rings which allow the camera operator or grip to preselect the continuously adjustable fluid drag and counterbalance on a numerical scale from 0 to 10.

Both the pan and tilt brake levers are easy to reach, and the Head features a convenient horizontal lock for setup.

With a 150 mm bowl, it offers a wide and stable base on tripods or hi-hats. The Head base includes 4 bolt threads for direct interface to most of the Pedestals.

COMMERCIAL CODE: HM2500
