Professional Video Specification

Offering 8K/30fps, 5.7K/60fps, 4K/120fps, which empowers creators with extensive options. Unleash creativity seamlessly across diverse scenarios.

Real HDR + Dynamic Range Boost

With 10-bit true HDR, it preserves more details of highlight and shadow. Switch on "DR Boost" to enhance dynamic range by 2 stops, and even enable shooting and saving 14-bit DNG photos.

F1.6 Fast Aperture, Effortless Low-light Capturing

With a fast aperture, it ensures more light intake, effortlessly producing clear, natural, and vibrant images even in low light.

End-to-End 10-Bit HDR Video Workflow

Supporting 10-Bit video workflows, it can capture, saving, processing up to 1 billion colors and fine details in ultra-high dynamic range, enhancing color depth and clarity.

SuperSteady Stabilization 2.0

Always produce stable and smooth footage, as if using a professional gimbal. It reliably performs even in high-speed motion scenarios like cycling, skiing, and aerial filming.

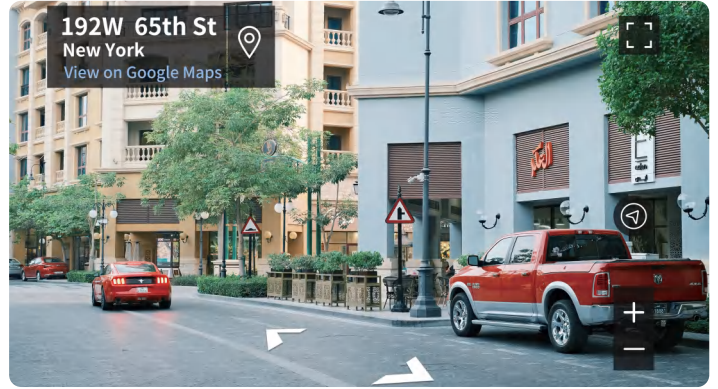

33-Foot Waterproof Capability

IP68-rated for rain, water, and dust resistance, enabling worry-free shooting and uninterrupted inspiration.

Immersive Spatial Audio

Features four built-in microphones to precisely capture sound from every angle, delivering an immersive spatial audio experience.

Built-in GPS Module

Featuring a built-in GPS module, capable of capturing videos in Google Street View format and recording continuous GPS information, making the creation of 360° Google Street View easy and efficient.
