- Multiple Power Inputs

## Details:

Introducing the SRD-Mini, the ultimate portable RF distributor tailored for location sound mixers operating out of a sound bag setup. This cutting-edge device ensures seamless connectivity and superior performance in demanding field conditions.

The SRD-Mini features an active splitter that corrects for line loss, ensuring your RF signals remain strong. With built-in RF overload protection and warning LED lights, you'll always be alerted to any potential signal issues, keeping your setup safe and efficient.

The SRD-Mini's 2x8 splitter design supports up to +16 wireless channels and provides exceptional flexibility for complex sound setups. Its ultra-wide spectrum covers a frequency range of 470 to 960 MHz, guaranteeing compatibility with a wide array of wireless brands. Whether you're on a film set, a live event, or any location requiring pristine wireless signal quality, the SRD-Mini delivers.

Furthermore, the SRD-Mini offers multiple power input options, including a Hirose-style 4-pin power input and USB-C. This ensures you can stay powered up no matter the circumstances, making it a versatile addition to your wireless equipment.

Compact, reliable, and packed with features to enhance your wireless ecosystem experience, the SRD-Mini is your go-to solution in the field.
