

UNISTELLAR

The Smart Solar Filter

New accessory

The Smart Solar Filter allows observers to safely view the Sun in just 2 minutes with their Unistellar telescopes.

This all-in-one package includes a solar filter designed to fit the Unistellar telescopes with a polymer sheet selected to reduce 100,000 times the Sun's light, and a solar mode in the Unistellar App to elevate observing experience to new heights.

Delivery	September
Go to Sun	Yes, in App
Sun Tracking	Yes, in App
Filter Category	White light
Light Reduction	100.000
Neutral Density	5
Material	Polymer, plastic
Mount Dimension	143 mm
Sheet Dimension	116 mm
Suitable	eVscope, eQuinox, eVscope 2, eQuinox 2
Solar Eclipses	Oct 14 2023 and Apr 8 2024
