

New STABIL G3

TOP SECRET

The STABIL G3 is our dampening upper arm designed to smooth out your shots while walking. The upgraded G3 version comes with a foldable upper arm, hanger & a locking lever for locking the arm in the 90° position. The STABIL G3 works best with gimbals.

The Gimbal Rig vest is now upgraded with a ratchet belt buckle system named the EASYLOCK. It is durable, easy to use and improves the overall look and feel of the vest. Now your vest can be tightened with just one hand. With the EASYLOCK, the Gimbal Rig vest also holds tighter around your hips. It can now be adjusted to fit a wider range of camera operators.

Designed and made in Sweden

Anna is using the standard Minimax with our Umbrella

The Easyrig **Minimax** is created specifically for lightweight camera setups. Supporting cameras weighing 2 - 7 kg (4-15 lbs)

The Swedish-engineered power spring system is specially designed to allow operation with a wide range of cameras.

A special release mechanism safely protects the Easyrig Minimax internals from weight overload.

The Easyrig Minimax is compatible with all Easyrig vests such as the Cinema Flex.

The **EASYRIG 3 Cinema** is our basic system which has a fixed shock absorber.

The maximum load on the **EASYRIG 3 Cinema** is 25 kg (55 lbs) with the 1 000 N gas shock absorber.

The **EASYRIG 3 Cinema** can be ordered with:

- Standard arm
- 130 mm (5") adjustable arm
- 230 mm (9") adjustable arm
- STABIL adjustable arm 265 mm (10")

Easyrig 3 Cinema

The **Easyrig Vario 5** has an adjustable weight range from 5-17kg (11-38 lbs) and a strong weight range from 10-25kg (22-55 lbs) You can also easily change the tension / power of the line.

The **Easyrig Vario 5** gives you the same advantages as our other Easyrig models with the added benefit of being able to adjust the line tension to adapt to many different cameras and configurations.

The **Easyrig Vario 5** still delivers the same steady hand held shots while relieving strain on your back, neck and shoulders. The load is redistributed to the hips allowing you to shoot hand held in comfort for hours.

DP David Paul is using a Vario 5 with a Gimbal Rig vest and a +130mm (5") arm

Accessories

Umbrella with holder

EasyTilt - Fits 25 & 30 mm

Quick Release

Hook with ball stud

Cheese Plate

Minimax with STABIL Light

Now with Hanger

The STABIL Light was developed to support gimbals between 2-7kg (4.4-15.4 lbs). It will help stabilize hand held shots to a certain degree while protecting your back. This enables you to operate the gimbal and camera for much longer periods of time.

The design is based on the original STABIL and has the ability to lock the arm so it functions as a standard Minimax. We have also made it more light weight so the user can stay agile.

The STABIL Light can only be purchased together with our new Minimax power pack. It includes a spring that synergizes better with the STABIL Light. The new power pack is now standard for all versions of the Minimax.

To upgrade you need to purchase the STABIL Light together with our new Minimax power Pack.

The STABIL Light is design- and trademark protected.

It is now delivered with our new hanger.
